

PlanAble

Audrey Harris, Lacey Boltz, Tope Adio, and Zayne Bonner

Outline

1.

Introduction &
Requirements

2.

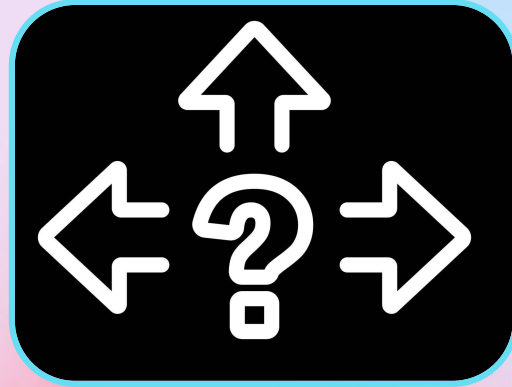

Our App,
Tech-stack,
& Demo

3.

Problems, Going
Forwards, and
Conclusion

What is PlanAble?

- Planner App
 - Low-Friction
 - Shame-Free
 - Reduce Cognitive Load
 - Minimizes Choice Paralysis
 - One-Thing Mode

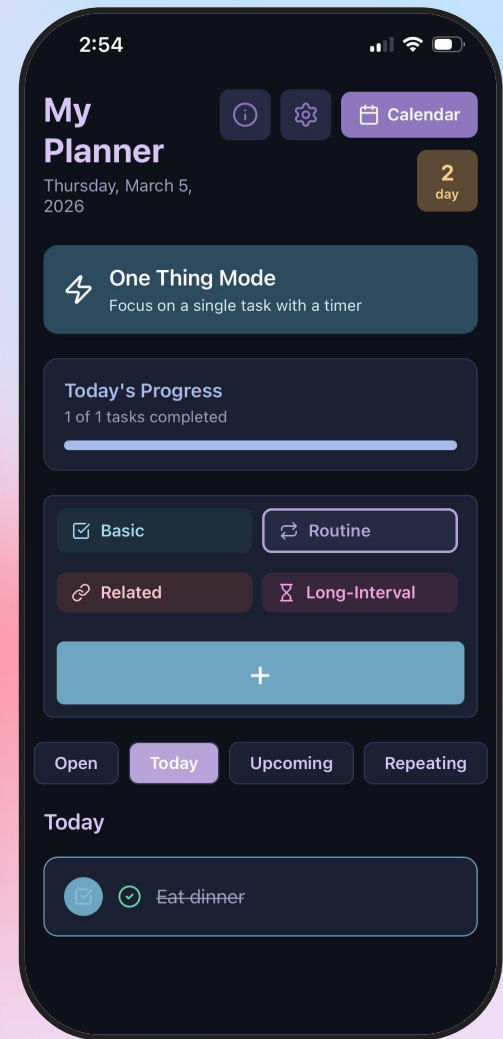

One Thing Mode

Focus on a single task with a timer

Audience

- Individuals overwhelmed by traditional planners.
- Anyone who wants a simple system and softer, shame-free approach.
- Everyone
 - **Focus:** Neurodivergent users (ADHD)

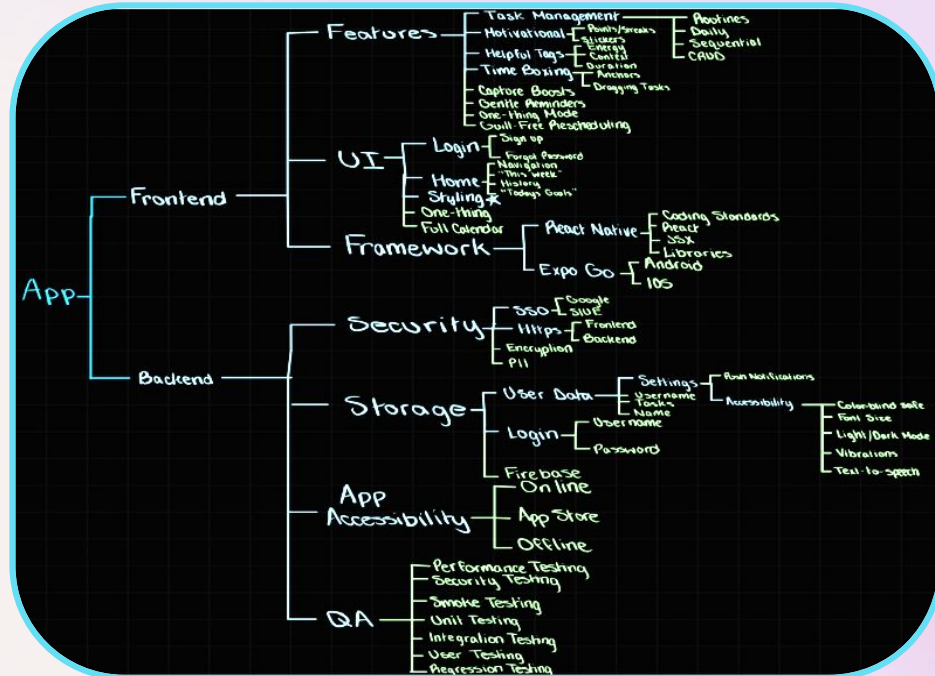

Requirements

- Simple UI
- Multiple task types
 - **Basic, Related, Routine, Long-Interval**
- Accessibility
- Security
 - **HTTPS**
 - **SSO Login**
 - **Standard Encryption**
 - **PII Concerns**
- Android/iOS

Documents

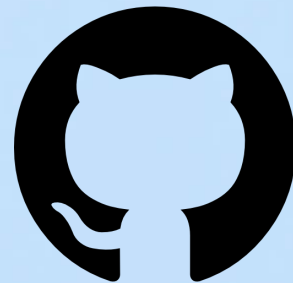

1. Initial Plan

- Overview of the development, testing, and release of our project.

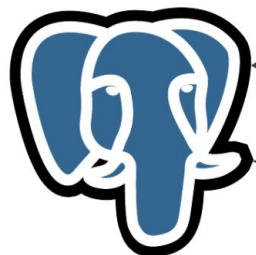

2. Acceptance Plan

- Culmination of everything we've done.
- Successful React Native Expo Build.
- Successful Testing Suite
- Client Satisfaction

Help Us Test Our App For Senior Project!

1. Download Expo Go from the app store

2. Complete a pre-test questionnaire

3. Scan QR code to enter app

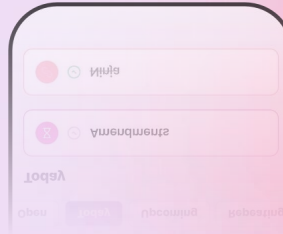

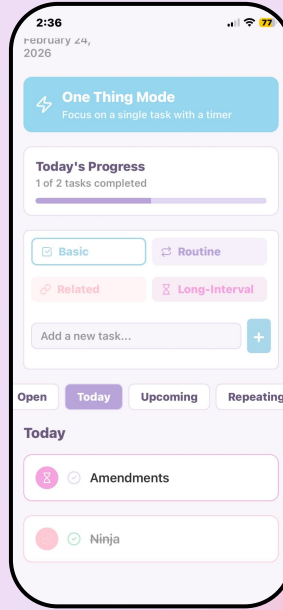

4. Complete a post-test questionnaire

Thank You ☺

Drawbacks & Future

 **iOS**

Drawbacks & Challenges:

- Time limitations
- Supabase Limitations
- Spring Break interfering with user testing
- Package and Library management

Future:

- Publishing - Android, Testflight, and IOS
- Continual UI fixes
- Where will our app end up?

Thank You!
